About

- Master's candidate in Electrical Communication Engineering at the **University of Kassel** (thesis submitted, defense August 2026), specializing in *digital signal processing*, *physical-layer waveform design*, and *constrained system optimization*.
- Conducted master's thesis research at **Rohde & Schwarz GmbH & Co. KG**, designing and implementing a **MATLAB** simulation framework to evaluate and optimize **5G NR** uplink waveforms across a 630-configuration parameter grid against PAPR, ACLR, BER, and throughput constraints over 3GPP channel models.
- Designed a digital IC in **Verilog HDL** for bisection-based root-finding, implementing **IEEE-754** floating-point arithmetic and a 5th-order Chebyshev polynomial approximation, validated through simulation testbenches; complementary experience programming microcontrollers (ATmega328P, ESP32, NodeMCU ESP8266) and integrating IoT systems.

Experience

- | | |
|---|----------------------------|
| <i>Master's Thesis Student</i> | <i>München, Germany</i> |
| Rohde & Schwarz GmbH & Co. KG | <i>Oct 2025 – Apr 2026</i> |
| <ul style="list-style-type: none">◦ Designed FDSS pulse filters with symmetric spectral extension for DFT-s-OFDM waveforms, recovering a ~2 dB BER penalty caused by per-subcarrier amplitude variation under MMSE equalization.◦ Performed constrained waveform optimization over a 630-configuration parameter grid (truncation factor, roll-off, extension ratio), balancing PAPR, ACLR (3GPP Power Class 3), and throughput; identified two BER-optimal operating regimes across a 0–10 dB SNR range.◦ Benchmarked optimized FDSS waveform against CP-OFDM, DFT-s-OFDM, and OTFS across AWGN, TDL-D (3 km/h), and TDL-C (120 km/h) channels; achieved PAPR as low as 2.87 dB while satisfying $\text{ACLR} \geq 30$ dBc.◦ Tech Stack: <i>MATLAB (5G NR Toolbox, Communications Toolbox, Signal Processing Toolbox, Parallel Computing Toolbox)</i> | |
| <i>Temporary Demonstrator</i> | <i>Colombo, Sri Lanka</i> |
| University of Sri Jayewardenepura | <i>Jan 2022 – Jun 2023</i> |
| <ul style="list-style-type: none">◦ Assisted with lab preparation, teaching support, and workshops in the Department of Electrical and Electronic Engineering, covering electronics, communication systems, signal processing, and IoT.◦ Programmed ATmega328P and ESP32 microcontrollers, simulated logic circuits, and configured routing protocols, VLANs, and DHCP/DNS on Cisco hardware.◦ Tech Stack: <i>Arduino UNO, ESP32, Raspberry Pi, Atmel Studio, Proteus, Cisco Packet Tracer, NI Multisim, Wireshark</i> | |
| <i>Freelance Engineer</i> | <i>Remote</i> |
| Self-Employed (Fiverr) | <i>Sep 2022 – Oct 2023</i> |
| <ul style="list-style-type: none">◦ Developed a web-based IoT visualization interface for real-time sensor data on Google Maps, integrating MQTT and Node-RED for live updates.◦ Designed a coordinated system integrating a differential-drive mobile robot and a 3-DoF RRR manipulator for autonomous object transfer, implementing GPS-based navigation and inverse kinematics.◦ Tech Stack: <i>Node-RED, Google Maps API, JavaScript, MQTT, Docker, Webots, MATLAB (Robotics System Toolbox)</i> | |
| <i>Telecommunication Engineer Intern</i> | <i>Colombo, Sri Lanka</i> |
| Sri Lanka Telecom PLC | <i>Feb 2020 – Aug 2020</i> |
| <ul style="list-style-type: none">◦ Rotated through Planning, Maintenance, and Network divisions; gained hands-on experience in fiber splicing, OTDR-based verification, and ADSL/FTTH router configuration.◦ Supported WDM/MPLS Layer 2/3 VPN provisioning and maintenance of MSAN and eNodeB transmission infrastructure.◦ Tech Stack: <i>Fusion Splicer (Sumitomo T-400S), OTDR, MSAN, Clarity OSS, TCP/IP, MPLS, NGN</i> | |

Education

University of Kassel

Master of Science in Electrical Communication Engineering

Kassel, Germany

Oct 2023 – Present

- **Grade:** 1.68
- **Thesis:** Pulse Design for Pre-6G Mobile Radio Systems
- **Coursework:** *Mobile Radio, Digital Communications, Signal Detection and Estimation, Information Theory & Coding, Simulation of Digital Communication Systems Using MATLAB*

University of Sri Jayewardenepura

BSc Engineering (Hons) in Electrical and Electronics, minor in Telecommunication Engineering

Colombo, Sri Lanka

Nov 2016 – Jun 2021

- **Grade:** 3.61/4.0 (Second Class Upper) | equivalent to 1.5 in the German system
- **Thesis:** Versatile Indoor Positioning System using Wi-Fi and Deep Learning
- **Coursework:** *Signal Processing, Digital Communications, Wireless Communication, Embedded Systems, Analog Electronics, Power Electronic Circuit Design, Machine Learning*

Projects

Pulse Design for Pre-6G Mobile Radio Systems

Oct 2025 – Jun 2026

- Implemented link-level simulations of four candidate waveforms (CP-OFDM, DFT-s-OFDM, **FDSS**-enhanced DFT-s-OFDM, OTFS) across AWGN and 3GPP fading channels using MMSE equalization.
- Validated optimal **FDSS** design over 5×10^6 simulation slots; achieved PAPR 5.81 dB below CP-OFDM while satisfying ACLR ≥ 30 dBc and throughput ≥ 10 Mbps.
- **Tech Stack:** *MATLAB (5G NR Toolbox, Communications Toolbox, Signal Processing Toolbox, Parallel Computing Toolbox)*

SAE-CNN Based Indoor Positioning System

Apr 2025 – Aug 2025

- Developed a deep learning indoor positioning system using Wi-Fi fingerprints with a stacked autoencoder (SAE) for feature compression and a 1D-CNN for position classification.
- **Tech Stack:** *MATLAB (Deep Learning Toolbox), UJIIndoorLoc and Tampere datasets*

Versatile Indoor Positioning System using Wi-Fi and Deep Learning

Oct 2020 – Jun 2021

- Fused Wi-Fi RSSI fingerprinting with accelerometer displacement features; KNN ($k=5$) achieved 72.77 cm mean error (78.7% within 100 cm), up to 35 pp improvement over RSSI-only baseline.
- **Tech Stack:** *Python (scikit-learn, TensorFlow/Keras)*

Root-Finding IC Design

Nov 2019 – Jan 2020

- Designed a digital IC for bisection root-finding in **IEEE-754** 16-bit floating-point, featuring a floating-point unit (FPU) and master algorithm unit (MAU) with $\ln(x)$ approximation via 5th-order Chebyshev polynomial.
- **Tech Stack:** *Verilog HDL, Icarus Verilog*

Technical Skills

Programming Languages: *MATLAB, Python, C/C++, Verilog HDL, Java, JavaScript*

Machine Learning: *scikit-learn, TensorFlow/Keras, MATLAB Deep Learning Toolbox*

Signal Processing: *NumPy, SciPy, Matplotlib; MATLAB 5G NR Toolbox, Communications Toolbox, Signal Processing Toolbox, Parallel Computing Toolbox*

Hardware & EDA: *Icarus Verilog, Vivado, OrCAD, Proteus, Atmel Studio, Arduino IDE*

Databases: *SQLite, MySQL*

Tools: *Git, L^AT_EX, Docker, Node-RED, Webots, Cisco Packet Tracer, AutoCAD, NI Multisim, Wireshark, Android Studio*

Language Skills

English: Fluent (C1) **German:** Elementary (A2) **Sinhala:** Native
